11:54 AM

- Reading the const response -> `pm.response.json();`

Assert statements:

- `Pm.expect(response.name).to.eql('alpha');`
- For array's iteration

```
Response.arrayobject.forEach((item)=>{
    If(Item === 'value')
        hasValue = true;
});
```
- Printing the value of a variable `${varName}`

Console.logs will be available in the preview tab of the body
