I Awarding of Grades

- a) Regular/Private candidate is declared as having passed the Intermediate Examination if he/she gets a minimum of 30% marks in each paper and 35% in aggregate in one attempt and appropriate Grade is awarded basing on the following norms:

Sl. No.	Grade	Range of marks percentage
1	A	Greater than or equal to 75%
2	B	Greater than or equal to 60% and less than 75%
3	C	Greater than or equal to 50% and less than 60%
4	D	Greater than or equal to 35% and less than 50%

- b) Minimum pass marks for individual papers of first year and second year under compartmental appearance for Private candidate is 35% and the candidate is awarded **Compartmentally** pass without any Grade.

II Blind, Deaf, Deaf & Dumb candidates are declared as passed 1st / 2nd year, if a candidate gets a minimum of 25% marks in each paper. The Grade is awarded basing on the marks secured in the papers appeared for.

III The Deaf, Deaf & Dumb candidates are exempted from passing in one language either under part I or part II. The Grade is awarded basing on the marks secured in the papers appeared for.

Note : 'E'- INDICATES EXEMPTION from passing in one language either under Part I or Part II in case of Deaf, Deaf & Dumb candidates.

IV **Environmental Education** is a compulsory qualifying subject in 1st year. Marks secured in this subject are not taken into account for awarding grade. Hence, marks secured are not shown against this subject.

- a) Maximum marks for Theory & Project work are 60 & 40 respectively.
- b) A candidate should secure minimum 35% of marks in Theory & Project work put together. In case, the candidate appears for Theory & Project work separately, he/she

the 1990s, the number of people in the world who are under 15 years of age is expected to increase from 1.1 billion to 1.4 billion.

As the world's population grows, the demand for food and other resources will increase. This will put pressure on the environment and on the world's food supply.

One way to meet this demand is to increase the amount of food that is produced. This can be done by using more land for agriculture, by using more water, or by using more fertilizers.

Another way to meet this demand is to increase the efficiency of food production. This can be done by using better farming techniques, by using better seeds, or by using better fertilizers.

There are many ways to meet the world's growing demand for food and other resources. It is up to us to decide which way is best.

One of the most important things we can do is to make sure that we are using our resources wisely. This means that we need to be careful about how we use land, water, and fertilizers.

Another important thing we can do is to make sure that we are using the best farming techniques possible. This means that we need to be careful about how we plant our crops and how we care for them.

Finally, we need to make sure that we are using the best seeds possible. This means that we need to be careful about how we choose our seeds and how we care for them.

By doing these things, we can help to meet the world's growing demand for food and other resources. This will help to make sure that everyone has enough to eat.

There are many other things we can do to help meet the world's growing demand for food and other resources. It is up to us to decide which things are most important.
